

Four-method concordance at the ALMT4_2 focal SNP (Ss10:15,394,673)

Soluble_Oxalate (vermillion) is the only Holm-significant single-marker signal; FarmCPU corroborates with $p < 0.02$, BayesB / BayesCπ PIPs are weak but non-zero

(A) MLM Wald (reference)

(B) FarmCPU (multi-locus)

(C) Bayesian shrinkage (BayesB / BayesCπ)
